

Using Vinyl Magic

Vinyl Magic is one of the best value products on the market for vinyl rejuvenation. One half ounce will treat an average vehicle. Most treatments will last two to three months. This is based upon 16 applications from an 8 ounce bottle.

Vinyl Magic works on: Cars, trucks, SUV's, RV's, boats, motorcycles, personal watercraft, and airplanes.

Where to use Vinyl Magic: Door handles, side cladding, front and rear bumpers, exterior mirrors, moldings, auto trim, graphics, running boards, steps and bed liners– Use Directions #1 to restore the original color and shine to all of these surfaces. **Vinyl Magic is not recommended for interior surfaces.**

Surface Prep or removal of dried Vinyl Magic. - Wash and dry surface thoroughly. You may use Isopropyl alcohol or lacquer thinner to remove any dirt and or previous dressings or coatings. We suggest you pre-test all cleaner products in a small inconspicuous area first. Rewax painted surfaces if needed. Then use Directions #1 below.

Please Note: **Vinyl Magic** will work on all vinyl surfaces unless they have been physically damaged or previously painted.

It's important for **Vinyl Magic** to absorb into the vinyl. Allow to dry or cure for 2-4 hours before getting wet or washing. If it is not allowed to dry, water may cause minor streaking. If this should happen, just reapply where needed. Use #1 Directions on the following surfaces and conditions. A second coat may be applied if needed.

#1 Directions-Shake bottle well. Make sure the vinyl surface is clean and dry before application. Apply a small amount of **Vinyl Magic** straight from the bottle onto one of our red applicator sponges or a blue mechanic's type paper towel. Rub in a circular motion then finish going in another direction, i.e., right to left then up and down. This ensures a thin, even finish. Use a dry micro-fiber towel to remove any excess on other surfaces. Follow instructions for cleanup.

Clean-up of sponge- Wash sponge with mild dish soap and water and lay flat to dry for future use. If using Mechanic's type (blue) towel material, soak in a container of water for several hours before disposing of. Protective latex gloves may be used, but they should be laid flat for 24 hours then disposed of. Wash micro-fiber towel separately with detergent and allow to dry.

Using Vinyl Magic and ScratchMedik Combo to restore other vehicle surfaces

We've discovered many new uses for **Vinyl Magic** that isn't even on vinyl.

We recommend using a soft cloth for applying and a micro fiber towel for removing excess.

#2 Directions

Shake both bottles well. Mix **Vinyl Magic** with our ScratchMedik Polish (1 part **Vinyl Magic** and 4 parts ScratchMedik or a good quality auto polish product) on a soft cloth, then buff by hand or with a slow speed buffer. Remove any excess product with a micro-fiber towel. This can used restore the original shine too many different surfaces. Use #2 directions for the following surfaces and conditions.

Clear Coat Scratch Repair – Clear coat scratches are just in the clear coat surface. ScratchMedik & **Vinyl Magic** combo fills in the scratched areas to make them disappear. Apply, buff in and then gently remove excess with a clean dry micro-fiber towel.

Hard Plastic Surfaces Side Plastic Trim between window glass & areas such as grill and front bumper areas- (*Ford F-150 trucks & Nissan X-terra and rear spoilers*). These surfaces are especially tough to rejuvenate. **Vinyl Magic** does an amazing job of restoring these to showroom new condition.

Luv Bug Concealer (Southern United States) – After a thorough cleaning the surface, apply Combo on front bumpers, hoods, and roof area. Then buff off gently with a micro-fiber towel. Allow to cure.

Rubber Molding Around Windows, Trim and/or Accents – These materials can start to dry out and develop a “moldy appearance.” **Vinyl Magic & ScratchMedik Combo** can clean and seal the surface and bring back the original color and shine.

Please note, Vinyl Magic will work on all vinyl surfaces, unless they have been physically damaged or previously painted.
